May 2019

Dear Delegate,

Welcome to Modules 1 & 2 of the BASHH STIs/HIV Course.

This course consists of 4 modules and aims to deliver the theory underpinning the clinical practice of GU Medicine and to meet the syllabus for the diploma of GU Medicine. The Diploma of GU Medicine runs twice a year; an application form can be found on the website. Further details of this exam can be obtained from the Society of Apothecaries.

As an aid to learning there is a list of useful reading materials and recommended websites. The National Guidelines for the management of STIs can be found by entering the BASHH website and clicking on the 'guidelines' link.

OSCE revision days for those who had completed all 4 modules and intend to take the Diploma in GU Medicine are considered useful for preparation nearer the time. Please contact the BASHH Course administrator in due course at admin@bashh.org for information on a future revision day.

Finally, I hope you enjoy the course. The venue provides a selection of refreshments throughout the day and a buffet lunch is provided each day.

Dr Ngozi Dufty
BASHH Course Director
